9500 HYBRID POLYURETHANE SEALANTS

XtraBond® 9500 is a high performance, one component, permanently flexible, easy to use, multi-purpose fast cure modified polyurethane sealant. XtraBond® 9500 cures rapidly when exposed to atmospheric moisture to form a durable bond.

FEATURES

- Non-Yellowing
- Paintable
- No Solvents
- Extrudes at Zero Degrees

APPLICATIONS

- Windows
- Sheet Metal
- Industrial Applications

XtraBond® 9500SL is a high performance, self-leveling, one component, permanently flexible, easy to use, multi-purpose fast cure modified polyurethane sealant. XtraBond® 9500SL cures rapidly when exposed to atmospheric moisture to form a durable bond.

FEATURES

- Self Leveling
- Non-Yellowing
- Paintable
- No Solvents

APPLICATIONS

- Masonry Applications
- Industrial Applications
- Roof Joint Seals

XtraBond® 9500TX is a textured high performance, one component, permanently flexible, easy to use, multi-purpose fast cure modified polyurethane sealant. XtraBond® 9500TX cures rapidly when exposed to atmospheric moisture to form a durable bond.

FEATURES

- Textured Appearance
- Non-Yellowing
- Paintable
- No Solvents

APPLICATIONS

- Windows
- Sheet Metal
- Industrial Applications

XtraBond® 9500UC is a high performance, one component, permanently flexible, easy to use, multi-purpose fast cure modified polyurethane sealant. XtraBond® 9500UC cures rapidly when exposed to atmospheric moisture to form a durable bond.

FEATURES

- Advanced Clear Formulation
- Paintable
- No Solvents
- Extrudes at Zero Degrees

APPLICATIONS

- Windows
- Sheet Metal
- Industrial Applications

XtraBond® 9500M is a highly flexible, gun grade, advanced polymer mirror adhesive. Specially formulated for bonding large and small mirrors to various substrates. It has excellent adhesion to all coated mirror backings including plate glass and acrylics, and has been designed with high flex, to address uneven walls.

FEATURES

- Highly Flexible
- No Solvents
- Mirror Silvering Safe
- Non-Sag

APPLICATIONS

- Mirrors
- Coated Mirror Backings
- Acrylics

QUALITY PRODUCTS THAT WON'T HARM THE EARTH

Premier Industrial Supply, Inc. (Premier) is committed to not only excellent products and services, but also the environment. We strive to be a leader in the global quest to be a "green" user of this planet and its environment.

The world is changing in its recognition on the effects of construction industry on the environment. There is a genuine increase in the awareness and supply of "green" goods, services, and standards within the construction industry.

Premier is committed to developing our products and standards consistent with the progression of an "eco-friendly" world.

Our "Green" series of sealants & adhesives are beneficial to the effect on the environment at two levels. First, by minimizing the adverse effects pollutants have on the environment. Secondly, increasing a building's efficiency.

VOC COMPLIANT

Increasing a building's efficiency is made possible by reducing the amount of heat loss (or intrusion) by sealing cracks, seams, and other openings. The environmental effect reduction is made possible by our extremely low VOC (volatile organic compounds) levels. All of Premier's "Green" products have VOC levels less than that required by the national standards.

GREEN ADVANTAGE
COMMITMENT TO THE ENVIRONMENT

ACRYLIC SEALANTS

XtraBond® 50 is a premium grade multi-purpose siliconized acrylic latex sealant. Manufactured to provide excellent adhesion to vinyl, aluminum, wood, sheet metal and most common building materials without the need of a primer. XtraBond® 50 cures rapidly to form a durable tight bond.

FEATURES

- Paintable
- Excellent Flexibility
- Watertight
- Mildew Resistant
- Minimal Shrinkage

APPLICATIONS

- Windows
- Cultured Marble & Tile
- Metal

XtraBond® 100 is a premium grade acrylic urethane sealant. Specially developed for the use in the installation of windows, doors and siding markets, XtraBond® 100 is mildew resistant and has been formulated to provide minimal shrinkage when cured. XtraBond® 100 cures rapidly to form a durable tight bond.

FEATURES

- Non-Yellowing
- Paintable
- Excellent Flexibility
- Mildew Resistant

APPLICATIONS

- Windows & Doors
- Siding
- Industrial Applications

FOAM SEALANT

XtraFoam™ is a very low expanding, one-component, multipurpose, polyurethane foam specially formulated to seal around window and door frames. The low pressure, airtight insulation foam blocks drafts, moisture and insects without bowing the window. It is environmentally safe, contains no CFC's or HCFC's.

FEATURES

- Low Expansion Formula
- Excellent Stability
- Excellent Adhesion to Most Substrates

APPLICATIONS

- Windows & Doors
- Areas of Air Infiltration

ECO-FRIENDLY FACT

Not only do the products listed here follow a "green" standard, we at Premier Industrial Supply go beyond the obvious. For instance, the plastic cartridges that our sealants and adhesives are filled in are made with post-recycled product, and we encourage our customers to follow a "recycling" program.
